Outback Decking is low-maintenance and cost-effective. Maintenance is effortless as there is no need to paint, oil, lacquer or stain. Outback Decking is an alternative to the regular maintenance associated with natural timber. With the easy installation guide, professional installers aren't required. Made from recycled HDPE and bamboo, Outback Decking has the environment in mind. It is also more ecologically sustainable as it is made from one of the fastest growing plants on earth. Weather-resistant, resistant to rot and decay, mould and mildew resistant – it is perfect to use around pools, alfresco areas and in the tough Australian conditions. Available in five colours – Midnight, Silver Bark, Mocha, Iron Ore, and Driftwood to suit various design needs.
